

R 107N *trolleys and roll containers*

Mobile Line

Due to the 2.5 mm thick metal, our Mobile Line trolleys are so strong that they have a maximum loading capacity of 50 kg! One colour for one another for the other. Thanks to the craftsmen's extremely precise work, we can now also supply Mobile Line with two colours of your choice in one piece of furniture: the interior finished in one colour whilst the exterior and edges are in another. This creates a genuine wow-effect and is available in every conceivable RAL combination. Trolley R 107N is equipped with one hinged door. Handy: there is a cable slit across the entire backside at the bottom. Industrial or transparent castors? It's your choice!
